

# Grafton Township Fire & Rescue Lock Box Program

## **What is a residential Lock Box?**

A lock box is a heavy metal box that contains a key to your home. The lock box is locked by a special key that is only available only to the Grafton Township Fire Dept and EMS.

## **Why have a Lock Box?**

In the event of an emergency, Fire or EMS personnel can use the special key to open the lock box. Rescue personnel would then use your house key to make entry into your home. This would save valuable time gaining access to you and your family and prevent unnecessary damage to your home.

## **Where would the Lock Box be located?**

The lock box would be mounted by Fire Personnel on the door frame between the main entry door and the screen door. You would then need to supply a house key so it could be placed in the box and locked up at that time.

**The cost of the Lock Box is \$24.00 – installation and shipping included.
