

Snow Removal Notice to private contractors and home owners

The Township has an ongoing problem with homeowners and private snow removal contractors pushing snow into the streets. It is important to know that the township has a right to keep its roads free from obstructions, and placing snow on the road from a private drive is creating or has the potential to create obstructions (which depending on the amount being plowed into the roadway) could create hazardous conditions. Along those lines, you may be exposed to liability if you place an obstruction or hazard on the road, if it might cause traffic hazards.

Please be courteous when removing snow from your driveways, and don't push it into the road.
